Passionate and innovative Front End Developer with over five years of experience in developing dynamic web applications. Seeking a challenging role to leverage my skills in modern JavaScript frameworks and contribute to the development of advanced user interfaces. Dedicated to writing clean, reusable code and staying updated with the latest industry trends.

PROFESSIONAL EXPERIENCE

Torah Live   *November 2022–Present*
Front End Developer

- Implemented best practices for developer experience to enhance focus on building.
- Led the integration of technologies such as i18n and ElasticSearch to improve performance and user experience.
- Maintained adherence to accessibility standards (a11y) and migrated codebase to newer technologies for future-proofing.

Sifra Digital   *April 2021-November 2022*
Front End Developer

- Developed user-friendly web applications using HTML, CSS, JavaScript, Vue.js, and React.
- Collaborated closely with designers and backend developers to ensure seamless integration of frontend and backend functionalities.
- Introduced agile practices to expedite development processes and foster teamwork.

EyeCarePro   *November 2018-April 2021*
Junior Full Stack Developer

- Developed client-facing projects using frontend technologies like HTML, CSS, JavaScript, and modern JavaScript frameworks.
- Contributed to the development of a Telemedicine application during the Covid-19 lockdown.
- Implemented RESTful APIs and migrated to microservices architecture for improved scalability.

EDUCATION

Jerusalem College of Technology (Lev Academic Center)
B.Sc in Computer Science   *October 2019*
